## THE VALUE OF SUSTAINABILITY

Unlike other water purification systems on the market, RO RUWA does not have a watertight tank.

You can enjoy healthy water according to your needs, which will come out of the tap uninterrupted, in quantity and quality.

No waste is generated and no plastics that pollute the planet are used the planet.

## HIGHEST QUALITY WATER

The RO RUWA reverse osmosis unit incorporates the most modern and highest quality filtration systems and of the highest quality to guarantee a low mineralisation, balanced water balanced and free of harmful elements for our health.

### 5 STAGES OF FILTRATION

- 1 Stage.** Filtration in 5 micron polypropylene.
- 2 Stage.** Filtration in top quality activated carbon.
- 3 Stage.** Reverse osmosis membrane of 600GPD (95 litres/hour), filtration degree 0.0001 microns\*.
- 4 Stage.** Reverse osmosis membrane protection by means of a food grade product that prevents premature clogging due to limescale and magnesium (Pearls Antifouling System).
- 5 Stage.** Post-filtration of high quality activated carbon.

\*A HUMAN HAIR IS 70 microns in size.

### A SMART EQUIPMENT

RO RUWA incorporates the latest control systems for optimal operation of the equipment.

We have eliminated the complex and old-fashioned displays full of numbers and letters that always fail and end up confusing the user.

RO RUWA provides you with the following messages in an easy, intuitive and understandable way:

- ✓ LEAKAGE SYSTEM WITH THE EQUIPMENT RUNNING.
- ✓ MEMBRANE CLEANING (AUTOFLUSHING) ACTIVATED.
- ✓ WATER QUALITY MONITORING.
- ✓ WARNING OF THE LIFE SPAN OF THE FILTRATION SYSTEM (MAINTENANCE)
